

“Solutions for Closing the Bakoteh Dumpsite and Supporting Changes to Modern Solid Waste Management in Kanifing, The Gambia”

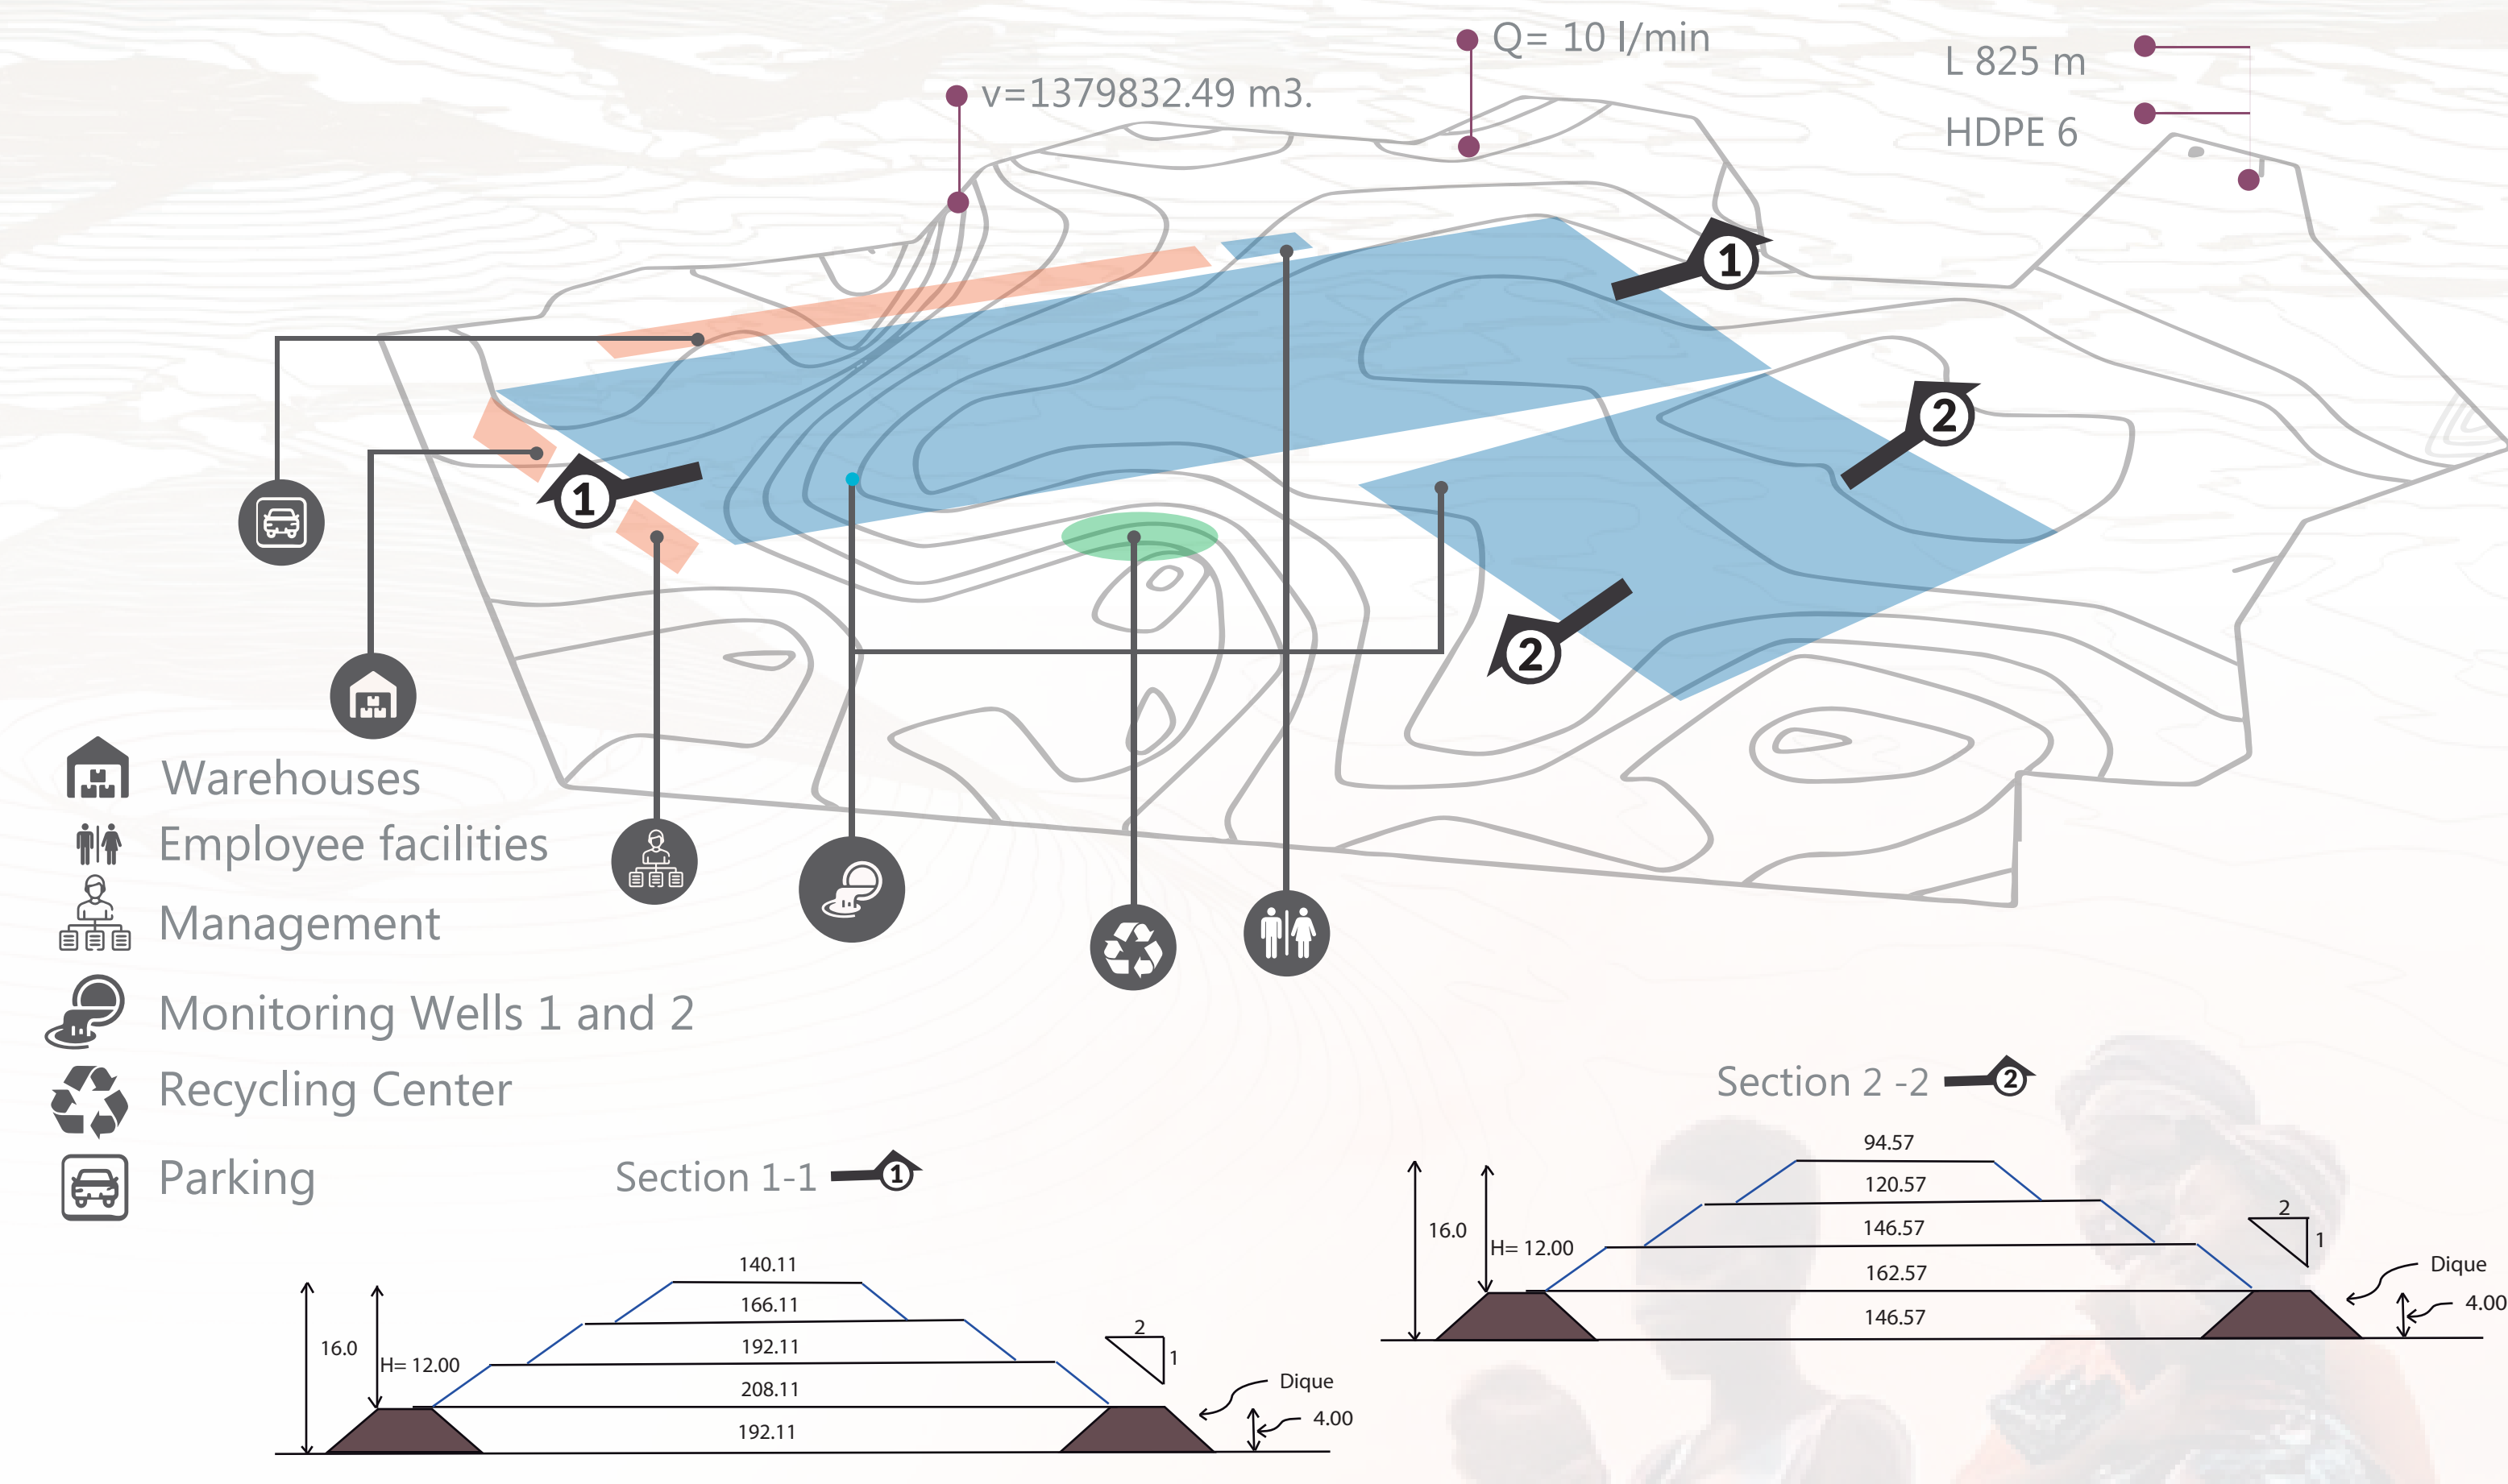

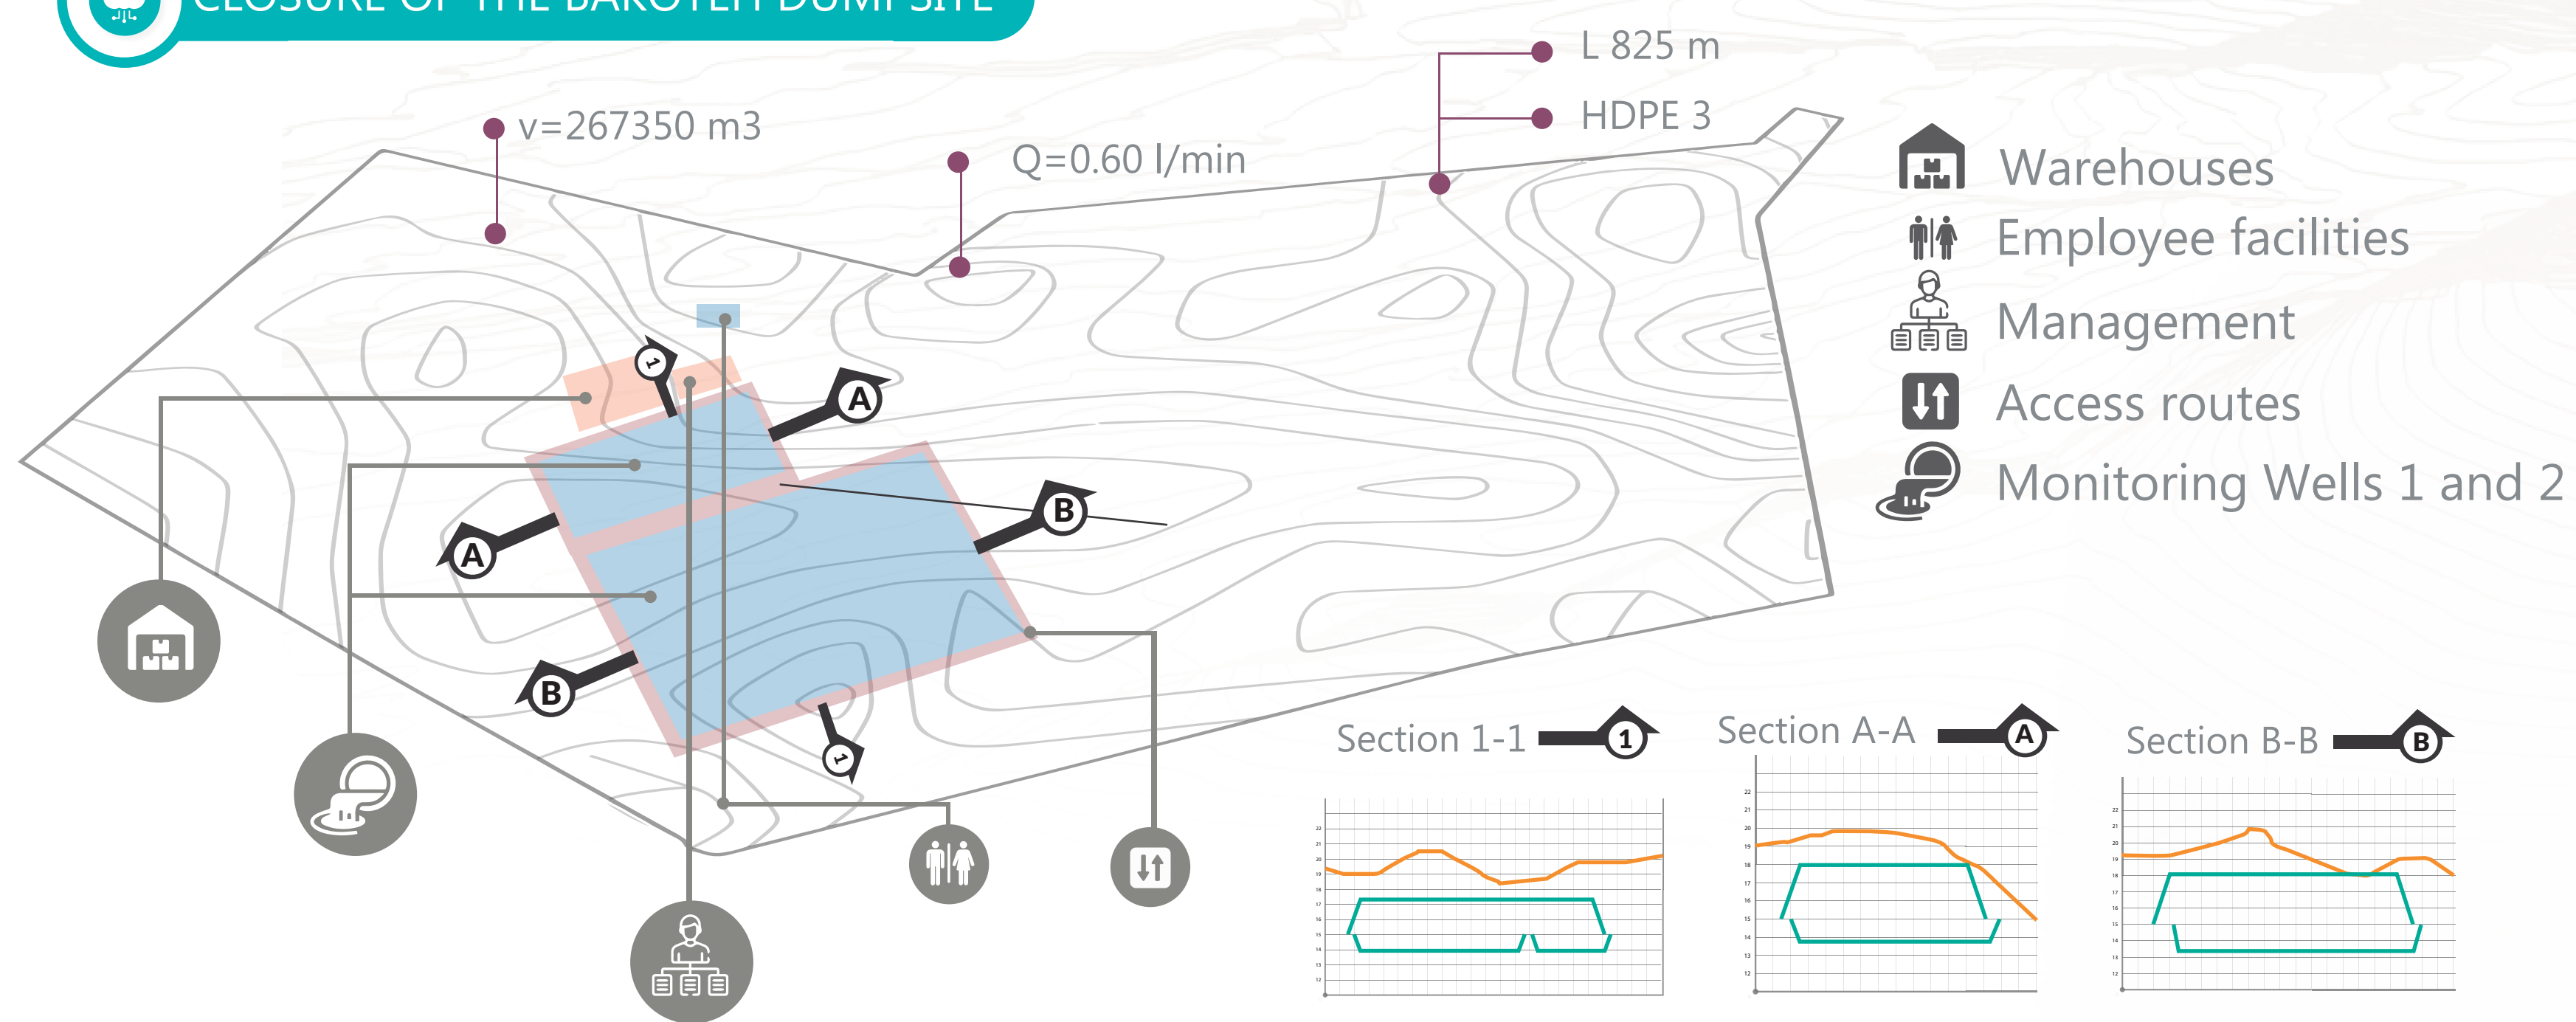

Theme

The closure of the Bakoteh dumpsite will mean a decrease in health and environmental problems, which is beneficial for the people living around. In addition, it is necessary to implement a sanitary landfill for the disposal of solid waste and avoid similar problems

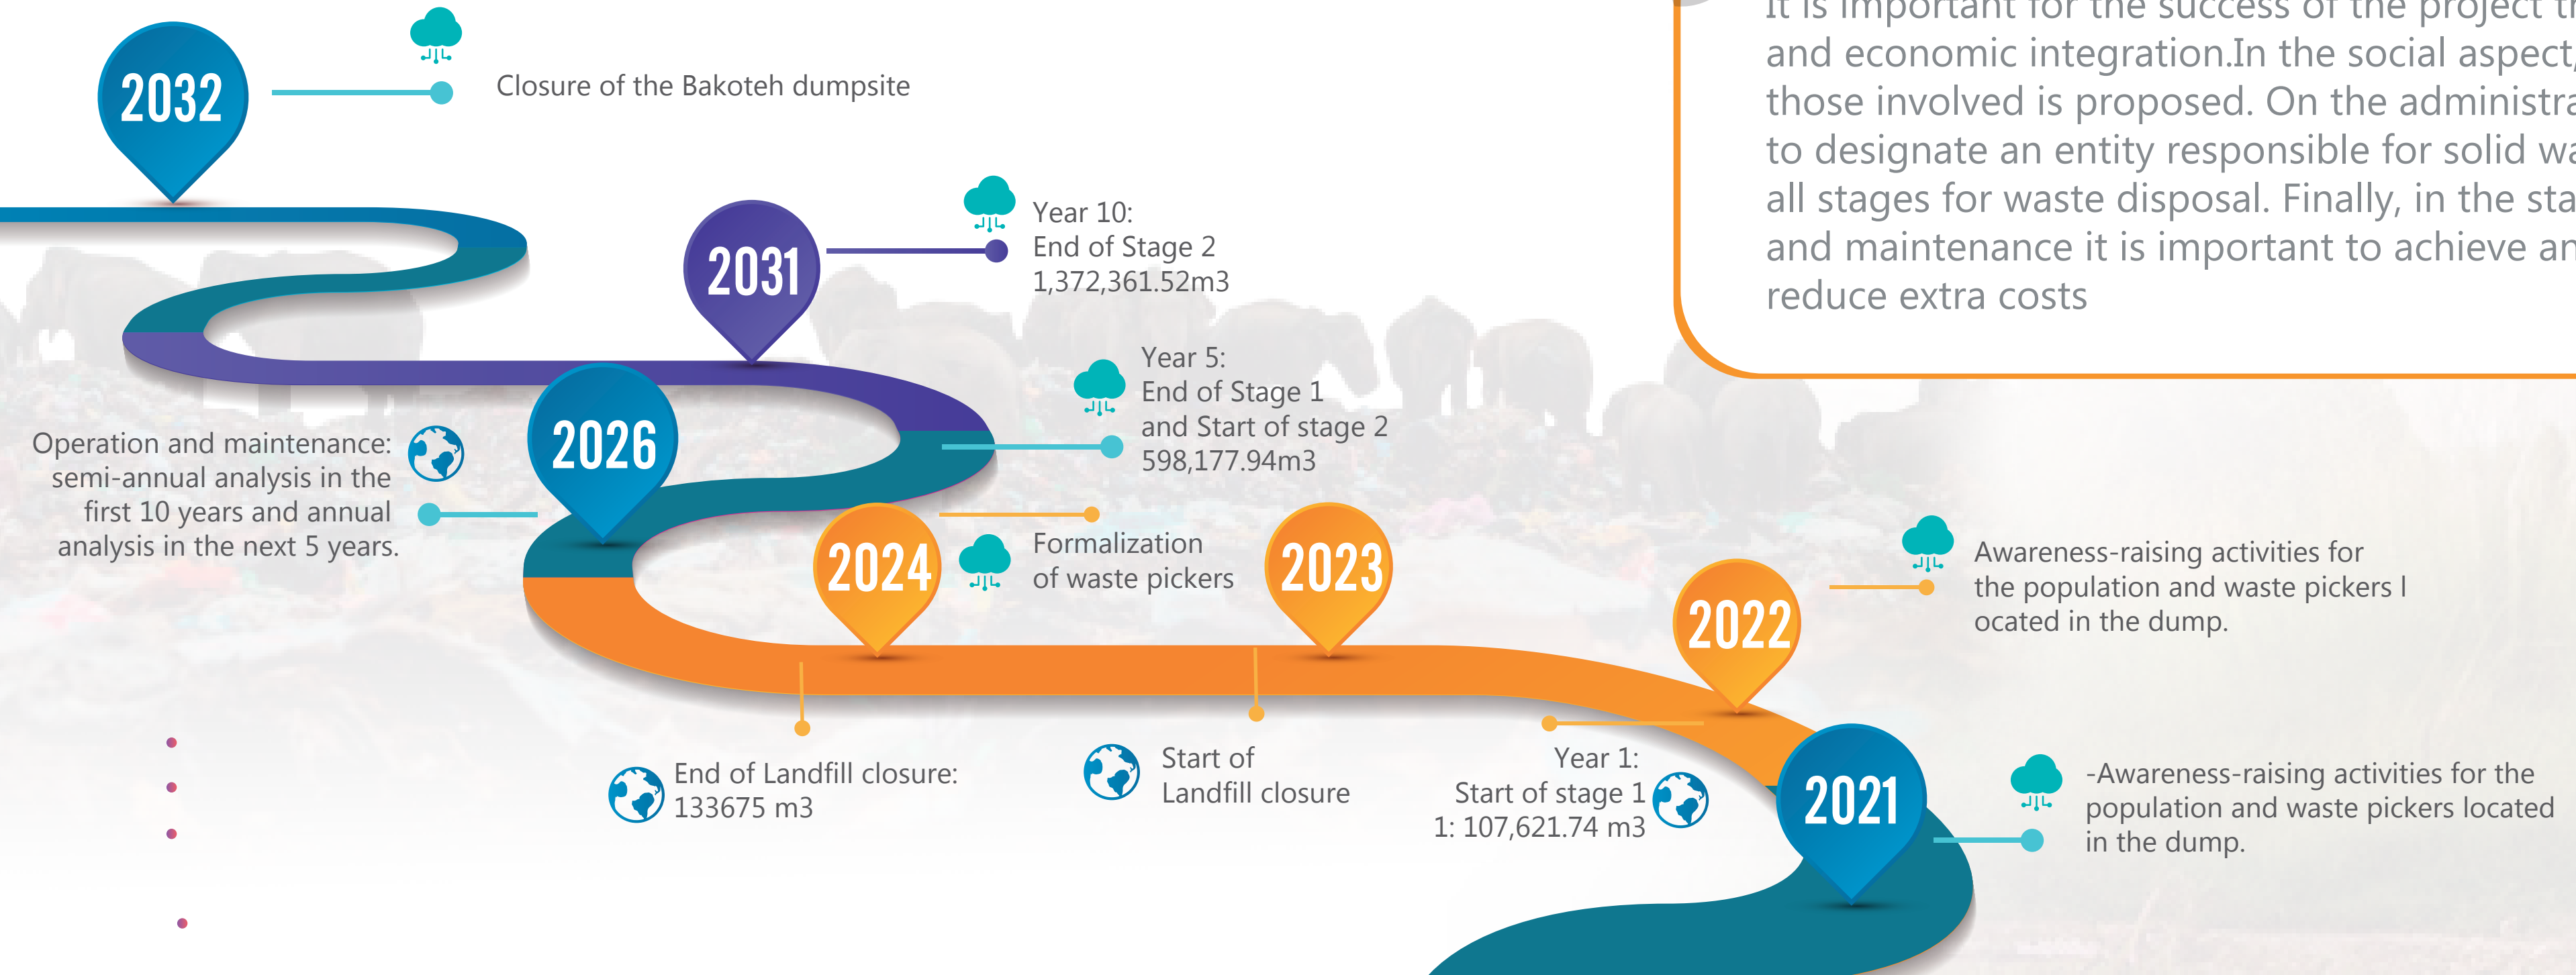

Members: Celith Inga, Walter Giraldo, David Valverde, Eduardo Quispe, Martha Medina, Walter Yerba, Valeria Alvarado, Cesar Fernandez
Adviser: Norvin Requena

NEW LANDFILL OF KANIFING

CLOSURE OF THE BAKOTEH DUMPSITE

Timeline

It is important for the success of the project that social, administrative and economic integration. In the social aspect, the participation of all those involved is proposed. On the administrative side, it is recommended to designate an entity responsible for solid waste management to organise all stages for waste disposal. Finally, in the stages of operation, monitoring and maintenance it is important to achieve an adequate realization and reduce extra costs
