Funded and Directed By SWANA Members

SWANA'S APPLIED RESEARCH FOUNDATION

Since its founding in 1961, the Solid Waste Association of North America continues to fulfill its mission "to advance the practice of environmentally and economically sound management of municipal solid waste in North America." Today SWANA continues to grow with over 8,000 members and 44 chapters in the United States and Canada.

Through the vision and commitment of a group of SWANA members, the Applied Research Foundation was created in the fall of 2000. The goal of the foundation is to support SWANA's mission through leveraging research dollars to conduct collectively-funded and defined applied research projects that address pressing solid waste issues.

By working together, subscribing organizations have the unique opportunity to determine what research topics should be addressed and to participate in the conduct of the research. The results of this research increase knowledge and efficiency by directly confronting problems of the industry.

SUBSCRIBER BENEFITS

As a Subscriber, you shape the future of the solid waste industry.

Subscribers have the opportunity to:

- Define, submit and vote on research topics
- Participate in two project review meetings held in conjunction with related SWANA symposia
- Network with local government and private sector leaders on the research topic in your area of interest
- Have direct access to interim results and final work products of the project during the subscription year
- Retrieve research products from all research groups free of charge.

Subscribers can join the SWANA Applied Research Foundation in one of four membership categories:

- Collection
- Landfill
- Recycling
- Waste-to-Energy
