SAFETY
BECAUSE SAFETY MATTERS
TO STAY ALIVE

SWANA wants you to go home to your family every day, safely. Never use your cell phone or text while operating machinery or working in a waste-to-energy facility.

Following these rules will keep you safe!

Safety Tips for Waste-to-Energy Operations

- Wear PPE at all times, this includes, safety glasses, steel-toed boots, hard hat, ear protection, arc/flame resistant clothing, and long-sleeve shirts.
- Complete site specific safety training prior to entering any processing areas, and complete necessary job specific training prior to working.
- Stay out of danger zones and at least 15-feet in front of and behind mobile equipment (loaders, tractors, compactors, dozers, etc.)
- Pay attention to restricted areas protected by yellow caution tape and never cross areas marked off with red danger tape.
- Always follow lock out/tag out procedures. No matter how quick or seemingly simple the task.

Following these rules will help keep you safe!
