

# Managing Recycling Systems

## TABLE OF CONTENTS

---

### LESSON 1: PLANNING A RECYCLING PROGRAM

Definition of recycling .....	1-1
Role of recycling in a solid waste management system .....	1-2
Benefits of recycling .....	1-4
Challenges associated with recycling .....	1-7
Policies and recycling .....	1-10
The waste stream and recycling .....	1-22
Targeting recyclables .....	1-25
Collection of recyclables .....	1-28
Recycling and tracking recyclables .....	1-31
Recycling and effectiveness .....	1-33
Recycling cost .....	1-40
Developing a recycling plan .....	1-41
Considering service provider options .....	1-45
Group activities .....	1-46
Resources and references .....	1-48

### LESSON 2: DEVELOPING AND RESEARCHING RECYCLING MARKETS

Identifying existing and emerging markets for recyclables .....	2-1
Determining the market's material specifications.....	2-7
Existing and emerging markets for various recyclable materials .....	2-9
Analyzing pricing and demand information for recyclable materials.....	2-21
Strategies for recycling market development.....	2-24
Group activity .....	2-25
Resources and references .....	2-26

### LESSON 3: COLLECTION OF RECYCLABLE MATERIALS

Choosing a collection strategy .....	3-1
Drop-off programs.....	3-5
Residential curbside collection.....	3-10
Multi-family collection .....	3-18
Collection from commercial sources.....	3-22
Collection of household organics .....	3-26
Special wastes .....	3-29
Group activity .....	3-31
Resources and references .....	3-33

LESSON 4: PROCESSING OF RECYCLABLES

Site and traffic considerations ..... 4-2  
Material flow through a MRF ..... 4-3  
How materials are sorted ..... 4-8  
Material consolidation ..... 4-13  
MRF costs ..... 4-14  
Improving processing efficiency and cost-effectiveness ..... 4-16  
Addressing the degree of processing required at mrf ..... 4-18  
Group activity ..... 4-23  
Resources and references ..... 4-24

LESSON 5: PLANNING AN EDUCATION AND OUTREACH PROGRAM

Importance of educating the public about recycling ..... 5-1  
Setting goals for an education and outreach program ..... 5-2  
Communicating with target audiences ..... 5-3  
Market research techniques ..... 5-8  
Developing the key message ..... 5-13  
Developing motivational messages ..... 5-14  
Developing informative messages ..... 5-17  
Selecting the appropriate outreach methods ..... 5-19  
Factors affecting frequency and timing ..... 5-29  
Education and outreach budget ..... 5-30  
Preparing for public interaction ..... 5-33  
Measuring progress and effectiveness ..... 5-38  
Group activity ..... 5-40  
Resources and references ..... 5-41

LESSON 6: ESTABLISH & MANAGE CONTRACTS FOR RECYCLING SERVICES

Procurement policies and methods ..... 6-1  
Contract specifications and standards ..... 6-8  
Contract administration and enforcement ..... 6-15  
Determining the best option of privatizing ..... 6-18  
Group activity ..... 6-20  
Resources and references ..... 6-20

LESSON 7: FUNDING A RECYCLING PROGRAM

Costs of recycling program elements ..... 7-1  
Factors that impact recycling system costs ..... 7-6  
Factors impacting financial support for a recycling program ..... 7-11  
Full cost accounting ..... 7-13  
Funding strategies for solid waste management and recycling programs ..... 7-20  
PAYT options ..... 7-33  
Funding strategies for capital improvement programs ..... 7-38  
Resources and references ..... 7-43

LESSON 8 – APPLYING END-USER STANDARDS & QUALITY REQUIREMENTS FOR RECYCLED PRODUCTS

Quality, cost and availability of recycled products .....	8-2
Recyclable and recycled content claims .....	8-5
Benefits of buying recycled products.....	8-9
National, state, and local buy recycled programs.....	8-10
Key elements of a buy recycled program.....	8-14
Barriers for buy recycled programs.....	8-16
Group activity .....	8-17
Resources and references .....	8-17

LESSON 9 – MANAGING RECYCLING PROGRAMS TO PROTECT HUMAN HEALTH AND THE ENVIRONMENT

Environmental, health and safety compliance.....	9-1
Maintenance of recycling drop-off sites and mrfs .....	9-2
Controlling off-site impacts of recycling systems .....	9-4
Potential health and safety issues in a recycling system .....	9-7
Recycling system safety and compliance .....	9-10
Safety-related planning and reporting.....	9-22
Resources and references .....	9-26
