

Organic Solutions, Inc.

PRESS RELEASE

OSI-PR1 -09/25/13

FOR IMMEDIATE RELEASE

The Florida Department of Environmental Protection (DEP) has issued the first **SWORPP (Solid Waste Organics Recycling Pilot Project)** Permit to Compact Solutions, Inc. d/b/a **ORGANIC SOLUTIONS, INC. (OSI)**.

FIRST SOLID WASTE ORGANIC RECYCLING FACILITY TO OPEN IN LAKELAND, FL

Organic Solutions, Inc. (OSI), a d/b/a of *Compact Solutions, Inc.* will be operating the first permitted **SWORPP (Solid Waste Organics Recycling Pilot Project)** in the State of Florida. The facility is located at 4345 US Hwy 92 East, Lakeland, Fl.

The **OSI** facility will be the first in North America to employ the revolutionary **Bio-Thermic Digester** for processing of organic solid waste. At present, the **OSI Bio-Thermic Digester (BTD) Unit** will be processing 18 tons of organic waste a day with **ZERO** grey-water output. Current operational data shows an average organic waste reduction of greater than 90%, with the added benefits of **clean water output** and **electrical generation**. All of this with **NO pre-processing** of the waste stream.

Laboratory testing has concluded that the post-process material is **completely sterile, safe to handle, beneficial as a soil amendment, and also excels as bio-fuel**. To date, European case studies have revealed an average organic reduction rate of 98% using solely organic input, and **55% to 65% mass reduction of Class 1 - Mixed Solid Waste**.

The first **OSI** facility is scheduled to be online and open by the second quarter of 2014.
