SCS Engineers Opens an Office Serving the San Francisco Peninsula

SAN CARLOS, Calif. – SCS Engineers is pleased to announce the opening of a new office serving the San Francisco Peninsula south to San Jose, California. SCS continues to provide environmental consulting and engineering services to municipal and private sector clients, and solid waste disposal facilities, recycling and repurposing facilities, landfill gas to energy services, to numerous public or private entities. This particular office enables SCS Engineers to enhance delivery of Environmental Services to our clients in the San Francisco Bay area.

The office is managed by James G. Ritchie, a Project Director leading the SCS Northern California Environmental Services multi-disciplinary teams. SCS teams combine technical expertise and contractual know-how, in collaboration with regulatory agencies, clients, involved stakeholders, and the public to facilitate property restoration and redevelopment projects.

Mr. Ritchie is a registered professional geologist in California and Washington with a career marked by successful work in environmental consulting and site restoration throughout the western United States. His expertise includes property transaction and development support, subsurface investigation, restoration and preservation, as well as mediation and litigation support, emergency response management, regulatory agency negotiation, and site closure.

The address for the new office is:

569 Laurel Street
Suite B
San Carlos, CA 94070
Telephone: 650-995-3312

About SCS Engineers

Since 1970, employee-owned SCS Engineers has delivered economically and environmentally sound solutions for solid waste management and environmental projects throughout the world. Engineering News-Record's (ENR's) latest report rates SCS Engineers a top performer in six environmental categories, and, for seven years, SCS has been rated the number one solid waste engineering company.

SCS provides engineering, construction, and long-term operations and maintenance services to private and public sector clients through a network of nationwide offices and from overseas. For more information about SCS Engineers, please visit our website at www.scsengineers.com or contact service@scsengineers.com.
